ERP Systems

Question 1:

What does the Profile Generator do?

[ANSWER] Answer & Explanation:

The Profile Generator creates roles. It is important that suitable user roles, and not profiles, are entered manually in transaction 'SU01'. The system should enter the profiles for this user automatically.

Question 2:

SAP Security T-codes?

[ANSWER] Answer & Explanation:

Frequently used security T-codes:SU01   Create/ Change User SU01 Create/ Change UserPFCG   Maintain RolesSU10   Mass ChangesSU01D Display UserSUIM   ReportsST01   TraceSU53   Authorization analysis

Question 3:

What is the difference between USOBX_C and USOBT_C?

> **[ANSWER] Answer & Explanation:**
>
> The table USOBX_C defines which authorization checks are to be performed within a transaction and which not (despite authority-check command programmed). This table also determines which authorization checks are maintained in the Profile Generator.The table USOBT_C defines for each transaction and for each authorization object which default values an authorization created from the authorization object should have in the Profile Generator.

Question 4:

What authorization are required to create and maintain user master records?

> **[ANSWER] Answer & Explanation:**
>
> The following authorization objects are required to create and maintain user master records: => S_USER_GRP: User Master Maintenance: Assign user groups=> S_USER_PRO: User Master Maintenance: Assign authorization profile=> S_USER_AUT: User Master Maintenance: Create and maintain authorizations

Question 5:
